Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 May 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Claims 1-9 have been filed and are under consideration in this Restriction Requirement. The previous requirement sent July 9, 2004 has been vacated because the instant Application is a 371 of a PCT and should be restricted according to 371 practice.

This Application was filed May 28, 2002. This Application is a 371 of PCT/JP00/5690, filed August 24, 2002. The Application also claims priority to a Foreign Application 11/236,778, filed in Japan, August 24, 1999.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 7-9 drawn to a therapeutic agent for neuropathic pain.

Group II, claim(s) 5 and 6, drawn to an animal model of neuropathic pain and a method for evaluating a compound for alleviating neuropathic pain, using the animal model of neuropathic pain.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: 37 CFR 1.475 states

Art Unit: 1632

that "an international or national stage application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn to one of the following combinations of categories.... a product, a process specially adapted for the manufacture of the said product and a use of the said product."

Further, opioid κ -agonists as a therapeutic agent for pain were known in the art at the time of filing. Barber and Gottschlich (1997, Expert Opinion on Investigational Drugs, 6:1351-1368) describe kappa agonists used as analgesic agents (section 3.1, page 1355-1358). Thus, the claims lack a special technical feature.

Group I contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Multiple therapeutic agents for neuropathic pain are encompassed by claims 1-4, 7-9. Thus for examination, applicant is required to elect one such compound within the scope of the claims. That is, the species elected must be defined by R groups in Formula I. Please select each R, A, and B group from the groups set forth in the claims 1+.

Should group I be elected, Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

It is noted that there are no generic claims.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
